
Fabian Gruber

Wiss. Projektmitarbeiter

22 Juni 1982

Anna-Stainer-Knittel-Weg 3/5/4
6020 Innsbruck
Austria

+43 650 258 75 21

Fabian.Gruber@uibk.ac.at

About me

I am motivated, flexible, curious, attentive, versatile, thoughtful, consequent, open-minded, patient, adaptive, reflective, of integrity and a team-player.

Kompetenzen

- R programming language
- Python programming language
- GRASS GIS
- SAGA GIS
- Arc GIS
- Adobe Illustrator
- Adobe Photoshop
- LaTeX & BibTeX
- German
- English
- Spanish

Interests

Geomorphology: shallow and deep-seated landslides, rock fall
Palaeoclimatology: dynamics of forest- and treeline, dendrochronology
Remote sensing: monitoring of slope deformations, terrestrial laser scanning
Computational Geography: slope stability modelling, point cloud processing

Education

1991 – 1996	Primary school	Timelkam, Austria
1996 – 2000	Secondary school	Vöcklabruck, Austria
2000 – 2006	College of Industrial Engineering	Vöcklabruck, Austria
2006 – 2009	BSc in Geography	University of Innsbruck, Austria
2009 – 2013	MSc in Geography	University of Innsbruck, Austria
2013 – 2017	PhD in Geography	University of Innsbruck, Austria
since 2016	Junior researcher	Institute for Interdisciplinary Mountain Research, Austrian Academy of Science

Experience & Teaching

08 2004 – 09 2004	Practical training	Volvo Business Service, Gothenburg, Sweden
10 2005 – 09 2006	Civilian service	Lebenshilfe, St. Florian, Austria
07 2009 – 08 2009	Practical training	Austrian Federal Forests, Hopfgarten, Austria
since 2009	Freelancer, graphic designer	Kompass GmbH, Innsbruck, Austria
10 2011 – 02 2012	Practical training	Austrian Research Centre for Forests Innsbruck, Austria

2015 – 2017	GRASS GIS	Morphometry, automatation and scripting, modelling
2016 – 2017	Introduction to R	R programming language, statistics

Selected publications

Zieher, T., Formanek, T., Bremer, M., Meißl, G., Rutzinger, M., 2012. Digital Terrain Model Resolution and its Influence on Estimating the Extent of Rockfall Areas. Transactions In GIS 16 (5), 691–699.

Zieher, T., Markart, G., Ottowitz, D., Römer, A., Rutzinger, M., Meißl, G., Geitner, C., 2017a. Water content dynamics at plot scale–comparison of time-lapse electrical resistivity tomography monitoring and pore pressure modelling. Journal of Hydrology 544, 195–209.

Zieher, T., Perzl, F., Gruber, F., Rutzinger, M., Meißl, G., Geitner, C., 2016a. Data requirements for the assessment of shallow landslide susceptibility using logistic regression. In: Landslides and Engineered Slopes. Experience, Theory and Practice. CRC Press, pp. 2139–2146.

Zieher, T., Perzl, F., Rössel, M., Rutzinger, M., Meißl, G., Markart, G., Geitner, C., 2016b. A multi-annual landslide inventory for the assessment of shallow landslide susceptibility - Two test cases in Vorarlberg, Austria. Geomorphology 259, 40–54.

Zieher, T., Rutzinger, M., Schneider-Muntau, B., Perzl, F., Leidinger, D., Formayer, H., Geitner, C., 2017b. Sensitivity analysis and calibration of a dynamic physically based slope stability model. Natural Hazards and Earth System Sciences 17 (6), 971–992.

Zieher, T., Schneider-Muntau, B., Mergili, M., 2017c. Are real-world shallow landslides reproducible by physically-based models? Four test cases in the Laternser valley, Vorarlberg (Austria). Landslides 14 (6), 2009–2023.
